Island village minecraft pe

[Take Me Back to GameSkinny Ultimate Minecraft Seed Guide] Sifting through dozens and dozens of Minecraft PE seeds can be in the chorus, there are just so many great floats around. If you're someone like me, you just don't want to waste all your time looking for seeds. You need to load each new seed, search for villages and resources, and see if the seed is worth your time. You just want to get right to explore and craft! Will any of the other 70 seeds have the biome I'm looking for? If I'm lucky, it could be number 70! Worse still, some seeds are changing from version to Minecraft version, and some seeds in the world differ in pe and pc versions of the game! What an butt pain. While I like to be a little lazy when looking for seeds, I realized I really should buck and just dive. I checked out every seed I could get my block shaped hands on and start checking the best PE 10.4 seeds all in one place. Of the 200+ seeds, which I tried 9x and 10x, these are the most epic biopics with the coolest rural spawning. This is the best village seed out there in Minecraft PE. Note: Seeds are sensitive to letter! Enter them exactly as they are. Check out our next article on Minecraft PC Seeds. Spawn near a double village with a double biomeSeed: cameroBiome: Mesa and plainsNotes: While this may seem like one big village, we can tell wells that these are actually two villages that just happen to spawn next to each other. This seed is unique in that half of the village is mesa biome, and half - on the plains; rarely can be found in the village of Mesos! This seed comes with a blacksmith containing: 2 gold ingots 2 seedlings 2 iron helmets 3 bread 1 iron pickaxe double biome villages make fun and fun survival games because you can bounce back and forth between the two. Spawn near a large mountain village and swampSeed: super pigBiome: mountains, swamps, desertNotes: Mountain villages are also very rare to find minecraft pe, making them a big catch! This seed spawns you right next to the very unique village, which actually melts into the rock. There are several houses that are actually elevated to the face of the mountain. That tall pillar of the house is a blacksmith, it contains: 2 iron socks 1 iron boots 2 bread keels 5 inkjet bags The village itself is not the only cool thing: under the center of the city there is a great cave system, and nearby there is a lush swamp biomass. Spawn near the village mesa and plains Seeds: shadowscytheBiome: Plains, mesaNotes: Mesa villages are already quite rare to find, so the village of Mesa on the river is quite an exceptional seed. When I'm looking for PE seeds, it's the kind that warms my heart just because it's so beautifully diverse. There is no blacksmith here, but there are several houses and a ton of farms for the size of the space. You can't see from the screen, but there's also a pretty large swamp biome on the nearby mesa side of the river. Spawn next to pumpkins bachilleresBiome: PlainsNotes: This is a very small village on the river that overlooks the beautiful bay area. Although it doesn't seem much, pumpkin and little port area on the water make this seed awesome. If you are looking for a beautiful place to call home or build in the harbour, it would be a great place. Also, pumpkins! Who doesn't like pumpkins? Spawn near the double river village (Herobrine)Seeds: herobrine is fakeBiome: desert, plainsNotes: This seed is one of my favorites on this list, if only because of herobrine seeds. While Herobrine has never been explained, this is the subject of much entertainment fan speculation. When you spawn, walk straight ahead to find two cities. Both are independent of each other and are not related, but they are close enough to easily travel back and forth. The river offers many great opportunities. Seeds: Que hayBiome: Plains, JungleNotes: Awesome urban design tends to be hard to find, so this cute little village seed is so great. The buildings here are very neatly organized, and the city is quite a big one well city. Built uphill, this seed is a small farm, some partially hidden houses, and a beautiful downtown area. Spawn near the snow village with ice spikesSeed: 1410403532Biome: Ice plains, plains, tundra, snowNotes: Walk straight from spawning, above the hill, and then follow the edge of the snow to find this epic rural location. Located on the edge of the tundra, you can see ice jumps without leaving the city! As one of the coolest features of the landscape in Minecraft, ice jumps near the village are a hot commodity. I have yet to see the seed that puts the village so close. This village is very cool and even has a little pumpkin patch (extra points)! Seeds: thisbattlestartedntBiome: Mushrooms, plainsNotes: The village in this IB seed it's pretty standard, but still great. The real splendor here is the fantastic and huge mushroom biomass that is so close. In seconds, you can travel from the city to an excellent area of the peninsula / island with mushroom loads. Also blacksmith with: 1 loaf of bread 2 apples 1 iron sword 2 iron ingots 2 obsidiano blocks 5 ink bags spawn near the triple village (awesome seeds!) Seeds: MamaMOOSEBiome: PlainsNotes: This seed is one of the most epic seeds I found. Look at this! You can see that there are three wells, which means that there are actually three villages here crammed together into one mega village. If you're looking for a huge village seed, it's for you. Spawn near the quad: 4 villages and 4 blacksmith emeralds in one seed! Village #1, near spawning village #2 and #3, further riverVillage #3 and #4 desertSeed: 1417801910Biome: Desert, Plains, savannah, swampNotes: The last seed had three villages slammed into one; This one has four villages all on a quick walk. You need to do a little walk to find them all, but they are pretty close to one. One of the best parts of this Minecraft world is that you spawn near the emeralds (place: blacksmith's chest), so life is much easier! Blacksmith in the first village: 2 iron ingots 2 emeralds 2 bread keels 1 apple Smith in the second village has: 2 emeralds 2 iron helmets 1 iron boots After the first turn of the village to the left of the spawn (so the village is on the left, and the swamp is on the right) and continues until you cross the river and you see the second village. From the second village you should see through the river to the third village in the desert. The fourth village is near the third. Spawn for a double village with coastal mountainsSeed: 1426064692Biome: Plains, mountains, forestNotes: Spawn during the turn to see the village. It is a great double seed of the village with a great place, beaten between the ocean and the river, lined with mountains. As the city extends down the coast, you can almost classify it as a port or port seed. The mountains are also perfect for many waterfalls and natural caves. Some villages and a few farms actually spawn in some mountains, so it's a wonderful seed spawning. Spawn near the awesome mountain villageSeed: vvvvvvBiome: Mountain, forestNotes: Yep, other mountain village seeds - but it's also super cool. Part of the village spawns on the mountain, and the rest is along the river or on the river. The local attraction is a very tall mountain house, which is almost pre-built in a small fortress. There is a blacksmith who has: 2 bread keel 2 golden ingots 1 apple spawn near two savannah villages and extreme mountainsSeed: xnxxBiome: Savanna, Mountain, desertNotes: As you spawn, you will see a crazy mountain in front of you. As you get close, circle the left side of the mountain and you will see the village. It's not your daily sand village, it's one right in some fantastic extreme mountains. The mountains here have crazy from above and even a few floating mountain blocks. The first village blacksmith has: 2 iron ingots 2 iron pickaxes 1 iron socks 1 obsidian a little further, if after the desert and savannah walls, you will see the second village. The second village blacksmith has: 2 emeralds 1 iron pickaxe 2 iron ingots 1 apple 1 iron chest plate Spawn island village with blacksmithSeed: 1427837471Biome: IslandNotes: This is one of the best island villages there, if only because it's a sweet blacksmith. The city and the island are quite small, but perfectly equipped with farms and villagers for a great game of survival regime. Island villages are quite common, but I have yet to find one with such a good blacksmith and the layout of the island. Blacksmith has: 2 emeralds 2 gold ingots 1 iron ingots 2 keg bread Have I missed any? There are an endless number of awesome and epic Minecraft PE seeds with great villages – this list is the tip of the iceberg. Do you have a favorite seed lazy that I missed? If so, drop it in the comments! [Take Me Back to GameSkinny Ultimate Minecraft Seeds
